HELP US TO EXPAND AND CONTINUE OUR MISSION

Blood cancer is a random killer. It can strike anyone, at any time. For many suffering from leukemia, lymphoma, other cancers, and inherited immune disorders there is hope of a cure through a bone marrow or peripheral blood stem cell transplant. That is, of course, if a matching donor can be found. That's where we come in!

The Gift of Life Marrow Registry is a public bone marrow and peripheral blood stem cell registry in the United States. Through its lifesaving work, Gift of Life is a world leader helping children and adults find matching transplant donors when they are needed.
